

Instructor Cheryl Malm

Class Graphing calculator agreement

Period

Course Description:

This is the graphing calculator agreement for Pre AP Calculus/Trigonometry students.

Graphing Calculator Agreement

Each student in Pre AP Calculus will be issued a TI-84 graphing calculator as long as a contract is signed by the student and their parent/guardians. If either the student or parent does not sign the agreement, a calculator will not be issued to the student to take outside of class. Access to a calculator in class will be allowed. The calculator should be brought to class EVERY day. There is no charge to use these calculators.

You must agree to treat the TI-84 graphing calculator appropriately. This includes but is not limited to the following:

Σ Do not leave the calculator in a vehicle overnight. The heat and cold will affect the calculator.

Σ No defacing the calculator or the lid.

Materials needed for the class:

Types of activities taking place in your classroom:

How students will be evaluated:

Discipline rules and expectations:

Consequences for inappropriate classroom behavior:
